Overview of the event:

World Bee Day is an annual event that is celebrated on May 20th to raise awareness about the importance of bees and other pollinators for the environment, food security and biodiversity. Citing the crucial importance of bees for mankind, Albert Einstein said

“If the bee disappeared off the surface of the globe, then man would have only four years of life left. No more bees, no more pollination, no more plants, no more animals, no more man.”

With an objective to generate awareness on conserving bees and sensitizing mass on their role and importance, poster competition was organized on 20-05-2023. Six students participated in poster making competition and they displayed their poster for discussion and exposure of other students and faculty member.

Purpose:

To sensitize students on importance of honey bees as pollinators.

Conclusion: The programme was concluded with constructive message of conserving the most crucial pollinators on earth and promoting discussion on judicious use of agro-chemicals that are posing threat to their population and causing biodiversity loss.

Attendance: Six as participants
